

Hello!

And thank you for showing interest in the International Science Summer Camp (ISSC)

ISSC 2019 will take place in Odense, Denmark at the University of Southern Denmark (You can fly to Copenhagen).

It is UNF (Ungdommens naturvidenskabelige Forening, The Danish Youth Association of Science) that will be hosting the camp. In the Danish Youth Association of Science, we strive to make science accessible to everyone – especially the youth. This year a way to achieve this is by hosting the annual MILSET's International Science Summer Camp. The academics of the camp will be at introductory university level but made accessible to high school students. Since, as mentioned above, the purpose of The Danish Youth Association of Science is to make science accessible to everyone, we encourage everyone with an interest in science to apply regardless of their academical level.

Academically:

The topic of this year's ISSC is: "The Materials of our Future", primarily from the angle of chemistry with a bit of the technical sciences.

While it is impossible to say for sure what the future will bring, we will try to guess it anyways. The academic program for the week will consist of the following parts:

Lectures: You will get the chance to hear about what materials will be used in the future, according to the beliefs of some researchers.

Laboratory work: You will get the chance to work in the laboratory, and make some materials using interesting methods.

Workshops: We will use some time to discuss whether we see a future for the materials that are used today. This will be done on a case-by-case basis.

A small project & Presentation: During the week you will be divided into groups, to make presentation about your chosen material.

Company visit: We are going to visit a company that works with a widely used material, which could easily be used in the future as well.

Socially:

ISSC is a great place to make new friends from abroad and learn about Danish culture. The social team will give the best possible environment to build strong bonds between the participants and Denmark with team building, storytelling and the famous Danish term "hygge"! Try Google it you won't be disappointed!

The international science summer camp (ISSC)

Social activities will be done in between learning sessions and you will be able to get out and experience Denmark on one of the days. Our goals are that the participants will make good friends and keep in contact.

Practical information:

Time and place:

- The International Science Summer Camp will take place July 13th through 20th 2019 at the University of Southern Denmark in Odense, Denmark. We will be working, eating, sleeping and do most of the other activities at the university. The sleeping quarters will not include mattresses or other forms of beds, so participants will need to bring something to sleep on and pillows, blankets etc. themselves.

Price:

- There is a participation fee of 150€.
 - **The registration fee includes:**
 - Meals (breakfast, lunch and dinner)
 - Accommodation
 - Programme of activities
 - Transportation between camps venues, from the nearest airport and to the university/accommodation.
 - Provision of drinking still water for the duration of the camp (preferably tap water)
 - The price **does not** include:
 - Transportation from the participant's home to the university's nearest airport.
 - Personal expenses
 - Cost of arrival earlier than the camp start date or departure after the camp and date.
 - Insurance (see below)
 - Visa if needed (but the coordinator will be able to help acquiring visa if needed)
- **Payment:** The participants will be able to pay the fee in advance (eg: by bank transfer). Alternatively, the host may accept payment upon arrival of the participants.

Insurance:

The Danish Youth Association of Science is **not** providing insurance for the participants. It is strongly advised that the participants are having an insurance that covers damage to themselves and others as well as damage to own and others property (like materials at the university)

Vidste du at?

UNF HAR AFHOLDT INTET MINDRE END 74 SCIENCECAMPS SIDEN DEN FØRSTE I 2002!

Igennem tiderne er det blevet til mange forskellige udgaver, med fagområder lige fra molekylærbiologi og kemi over fysik, matematik og robotvidenskab til fremstilling af spil og software-applikationer!

VORES AKTIVITETER NÅR UD TIL 10-15.000 HVERT ÅR?

Hvert år afholdes der i UNF ca 150 aktiviteter, og disse besøges af rigtig mange mennesker. Vi havde f.eks. ca. 12.700 deltagere i 2015!

AT DER I UNF HAR VÆRET MERE EN 1.000 FRIVILLIGE IGENNEM TIDERNE?

I UNF er vi afhængige af vores frivillige - lige pt er vi omkring 300 frivillige!

Did you know?
UNF has arranged 74 science camps since 2002
Through the years the science camps have had many different versions, with different areas in the sciences. Everything from Molecular Biology to Game development and Robot technology
Our activities reach 10 – 15000 people every year.
Every year UNF has 150 activities and these are visited by a lot of people. For example, 12.700 participants in 2015.
UNF has had more than 1000 volunteers through the years.
At the moment we are 300 volunteers and have been an association since 1944.

Vidste du at..

UNF har holdt 74 ScienceCamps siden 2002?

Dengang blev den første BioTech Camp afholdt, og det var den eneste camp den sommer efter et pilotprojekt i 2001.

Did you know...

UNF has arranged 74 Science Camps since 2002.

In 2002 the first BioTech camp was arranged, it was the only camp that summer after a pilot project in 2001.
